About our company

Elitech
Systems Pvt. Ltd.

Elitech Systems is a future-ready, innovation-driven, and customer-centric technology company; aiming to deliver high-end IT services with ingenious business models to gain strategic business advantage.

About us

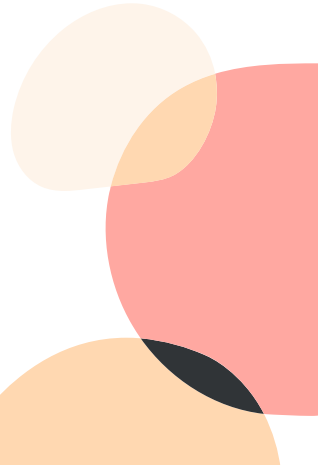

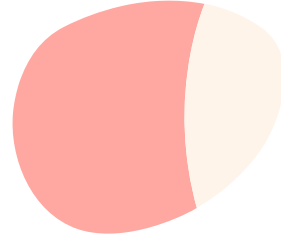

Elitech has been at the forefront of custom-tailored application development since its humble beginnings in 2008. Our innovative and disruptive solutions have helped our client connect with billions of people, be it a simple website, a multi-tenant and multi-vendor-based eCommerce platform, a stock price prediction ML model, or just an ERP system.

Our Mission

Curating innovative and creative solutions that use data-driven and research-oriented processes leads to a truly unique outcome and help our clients stand out.

Our Vision

To become the largest, most economical, and desirable IT service provider for clients across the globe.

Our Core Values

The values that define Elitech.

- **Agile**, Our team members are always up for the toughest challenges.
 - **Perseverance**, Exceeding the expectations to rise as the best.
 - **Quality**, Providing the best possible quality-driven service.
 - **Commitment**, Looking forward to making the quality better with each passing day.
 - **Accountability**, Believing that our promise means a lot to you.
 - **Integrity**, Open and honest communication for everything.
 - **Collaboration**, We work for our client; with our client from start till finish.
 - **Security**, We make sure Prevention is always better than cure.
-

And still going strong!

02

Our services

Solutions we excel at

Our innovative and disruptive solutions have helped our client connect with billions of people, be it a simple website, a multi-tenant and multi-vendor-based eCommerce platform, a stock price prediction ML model, or just an ERP system. Our solutions are derived using the latest technology and in-depth research. Moreover, we make sure that you get the ROI you expected; our range of solutions includes,

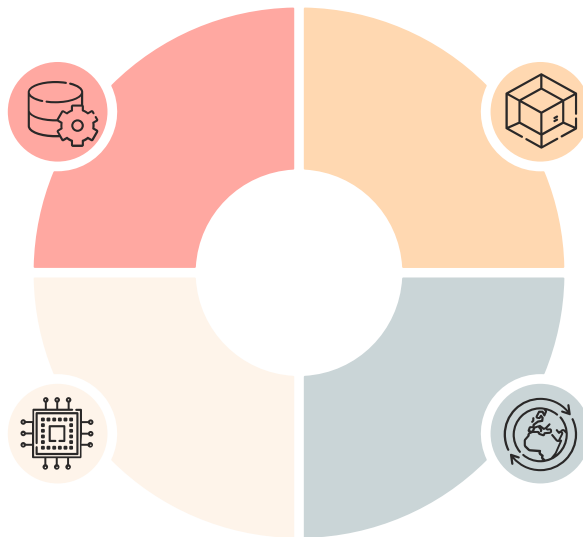

Our Solutions

Data, Analytics & AI

Data is an important business asset. With it, we can help you to learn about evolving opportunities, hidden threats, changing customer expectations, and the competitive landscape.

AI & Automation

AI is the new workforce. With it, we can help you make leaps and bounds by streamlining tedious and repetitive human tasks by automating communications, and can also take sales and marketing to the next level.

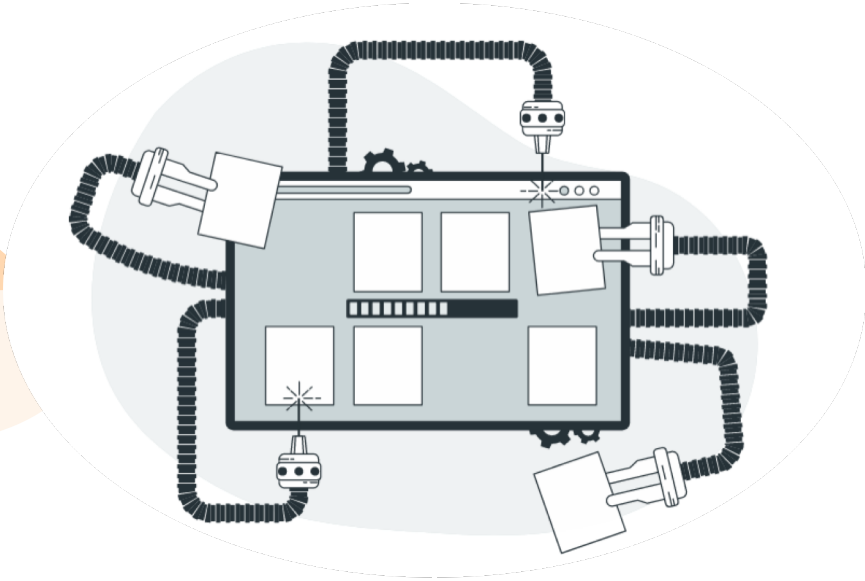

Blockchain Development

With blockchain-based solutions, we can help reduce losses, avoid fraud, eliminate expensive intermediary fees, boost local & international trade, distribute sensitive info & much more.

Internet of Things

IoT is a secure and reliable method for collecting data. With it, we can help you accumulate and analyse the data from physical objects to make transformative improvements & add automation to your business processes.

Our Solutions

Web Designing & Development

Combining modern design, UX thinking, and deep research, we create highly secure, agile, and scalable custom-tailored web solutions for your niche and help you grow in your business.

eCommerce Enablement

B2M(Business-to-many) model opens reach to a larger target audience. We can help you create an ecosystem for online sales that covers financial flows, integration with ERP or inventory application, logistic operations, and much more with sales enablement for a flawless online sales migration.

Mobile App Development

No matter under which niche your project falls, we can build an innovative user experience and a professional-looking mobile, tablet, and wearable app to your requirement, in your budget, and as per your timeline. With pre-built android & iOS app solutions and frameworks, we help accelerate your digital journey and reduce time-to-market.

03

05

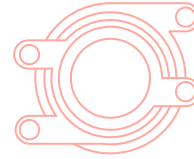

Our Business Model

Our Work Methodology

A project management methodology is a set of principles and practices that guide us in organizing projects and ensuring optimum performance. Project management is the most critical aspect when starting a new project. That is why we have trained our experts to work using any of the following methodologies.

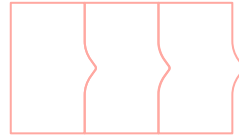

Waterfall

Agile

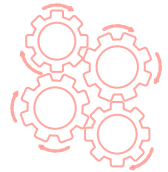

Scrum

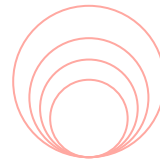

Kanban

Scrumban

Extreme Programming

Lean

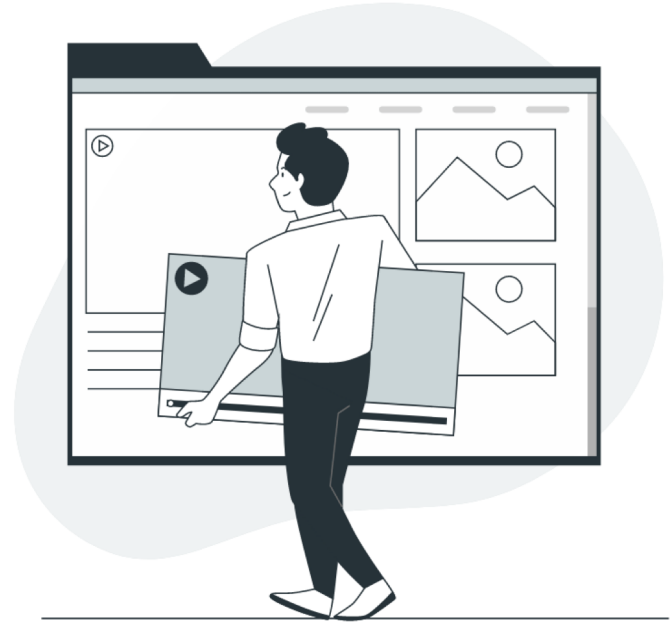

Work Process

- Step 1** Communication Initiation
Signing of NDA, IP Rights & Security Assurance

- Step 2** Understanding Requirements
From feasibility check, Brainstorming & Understanding to defining high-level scope with SLA & contract

- Step 3** Scope Analysis Process
In-depth research, detailed scope documentation to wireframes & technical study with project plan

- Step 4** Resource Allocation
Candidate shortlisting, sharing of resource profiles, milestone bifurcation & timeline definition

Work Process

Step 5 Planning & Execution
Sprint planning, daily meeting, designing, development, testing, & deployment

Step 6 Reporting Process
Reporting on daily basis using PM tools, on weekly basis through email & calls, and fortnightly demo with Milestone tracking

Step 7 UAT & Release
UAT feedback & bug resolution, deliver of Well-crafted software, & deployment of assets and code

Step 8 Aftercare
Knowledge transfer, continuous support, & submission of notes/user manuals

Engagement Model

We have built our engagement model to achieve a successful long-term relationship with our clients. Our models are straightforward, flexible, and aligned with the interest of our clients.

We offer following models;

- Fixed Pricing Model
- Time & Material Based Model
- Dedicated Hire Model

Fixed Pricing Model

The Fixed Price Model works best for projects with well-defined scope and deliverables within a fixed time frame and budget. If you have not or are unable to define the scope, Elitech helps you define a proper project scope based on your goals.

Suitable for,

- Build a product prototype
- To build an MVP (Minimum Viable Product)
- Craft a simple web-based solution
- To manage a small or medium project which lasts for no more than a few months

Benefits of Model,

- Fixed and well-defined scope and budget
- Clear and structured milestones
- Fixed timeline for delivery
- Low risk

Flexibility

Deliverability

Economical

Time & Material Based Model

The Time & Material based engagement is the most cost-effective model where the amount of money you spend corresponds to the amount of work delivered. Furthermore, you can make sure that the project meets market needs by validating it before it's too late to change. At Elitech, we can help deliver projects at blazing fast speed with our team of developers.

Suitable for,

- Need the ability to add or remove project resources
- For large project with many iterations
- If your product requires continuous research
- Requirements are constantly evolving
- Your developments needs will deviate over the time

Benefits of Model,

- Easy to accommodate
- Can change project scope anytime
- Can adjust resources anytime
- Ability to test and experiment with new requirements
- Option to make hourly, daily, weekly or monthly payments
- Pay only for the work done

Flexibility

Deliverability

Economical

Dedicated Hire Model

This model is suitable when you need affordable yet quality IT team that can plan, design, develop, test, and deploy a product as per your requirements. We can provide a highly expert team of professionals, infrastructure, and necessary facilities for your ever evolving business needs. We have a team of expert developers in multiple locations that can help you streamline your business with compelling and innovative tech solutions.

Suitable for,

- Long-term projects
- Looking to reduce overhead cost
- Build technical team without having to worry about infrastructure, hiring, and project management
- If you want to focus on sales and growth by outsourcing technical development and support

Flexibility

Deliverability

Economical

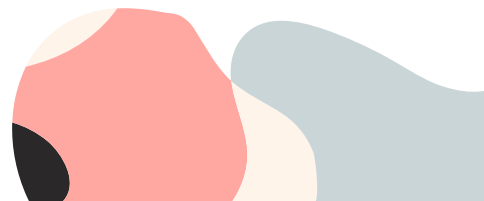

Benefits of Model,

- Cost effective
- Faster development cycle
- Effective and quick communication
- Ability to test and experiment with new requirements
